

YOUR FIRST NFC WIND DOWN

PAIR IT ONCE. USE IT NIGHTLY.

1

PLAN

Finish your Wind Down starting point. Allow Screen Time and choose the apps or categories you want Counting Sheep to limit.

2

PAIR

Open Settings > Protection & tags. Choose Start with an NFC tag, then tap Set up NFC tag.

3

PLACE

Place the paired tag where your phone should rest outside the bedroom. The location stays private on your iPhone.

4

START

When Wind Down begins, tap Put phone away. Hold the top of your iPhone near the tag, then leave the phone there.

5

WAKE FIRST

Selected apps stay limited through Screen-Free Morning. If you need your phone sooner, Counting Sheep keeps an early exit available.

PUT YOUR PHONE TO BED.

Wake before it does.
